

APPLICATION

Lanyard with energy absorber provides a connecting element between a fixed or mobile anchor points and the attachment point on the harness.

The energy absorber safely arrests a fall from a height. Without the shock absorber, a free fall of more than 50 cm can cause serious injury

Technical characteristics

The LDA lanyard is made up of:

A braided rope of 12.5mm made of polyamide fibers 6.6tex with an energy absorber

Absorber lanyard

- Length (L): 1.00m - 1.50 m - 1.75m - 2.00 m.

- Buckled and stitched

Description

The LDA lanyard is formed by:

A braided rope of 12.5mm made of rigid polyamide fibers,

The specific weaving of the polyamide fiber protects the rope against abrasion and cutting during a fall.

A tear-type energy absorber formed by a tear-type absorber strap and a 45mm polyester safety strap. The safety strap provides a backup in the event of a fall, taking up the load after the tear-type absorber strap has reached its maximum elongation.

The LDA lanyards can be supplied in stretched lengths of 1.00m - 1.50m - 1.75 m - 2.00 m.

The LDA lanyards can be equipped at their ends with the following connectors: M10 - M11 - M12 - M13 - M15 - M40 - M41 - M42 - M51 - M52 - M53 - M54 - M56 - M60.

Norm:

LDA High Capacity Range 150 kg kernmantle fall arrest lanyards can be used vertically and horizontally (flat-roof use), where edges have a minimum radius of 0.5 mm

Conform to:

- EN355
- Technical file CNB/P/11.074 « horizontal use»
- Technical file CNB/P/11.062 “fall arresters with capacity in excess of 100 kg”.
